

DIA 3000

The DIA 3000 links identity management and people management by capturing and storing fingerprints, facial portraits and demographic information of individuals. Persons are identified through their fingerprints irrespective of the identification provided.

BIOMETRIC BENEFITS

- 1 Fingerprint** Identification and/or Verification.
- 2 Business Accountability:** identify employees or clients positively.
- 3 User-friendly:** software is easy to navigate with minimal training.
- 4 Time-saving:** once enrolled individuals can be identified in a matter of seconds.
- 5 Security:** biometrics provide a long-term security solution using unique identifiers and encryption.
- 6 Versatility:** integration ability with client software as well as mobile applications.
- 7 Scalability:** biometric databases are customized to suit client and industry requirements.
- 8 Return on Investment (ROI):** elimination of fraud, identification of potential criminal elements, efficient management of human resources.
